

# Job Opening

BAAT Medical Products BV  
Hengelo, The Netherlands

## Junior Quality Engineer

Jr. RnD Quality engineer (0-3 years of work experience) to support the RnD Quality engineer and grow in the position.

BAAT is looking for a starter in this position. The person will be trained and guided by the Sr. Quality engineers and the Quality and Regulatory manager. The purpose of this position is to train and grow the person into the position and responsibility of an RnD Quality engineer.

### Job Description Junior Quality Engineer (Design Transfer and R&D)

The Junior Quality Engineer supports and ensures that the primary process is effective and as efficient as possible. The Junior Quality Engineer is responsible (under supervision) for the application of the Quality Management System and supporting the colleagues in understanding and working with the Quality Management System.

### Typical Tasks:

- Review and approve project documentation to ensure it is in line with the QMS and Quality standards
- Facilitate stage gates reviews and release of DMR's
- Support and monitor ECO's to address design and scope changes in R&D
- Together with the Regulatory Affairs Officer support the Risk Management Process
- Audit and qualify new suppliers
- Support manufacturing, cleaning and sterilization process validation at suppliers (IQ, OQ, PQ)
- Setup and review supplier, distributor and customer quality agreements
- Lead the design transfer process to the BAAT Operations department or customer operations department (Device Master Record)
- Lead CAPA's related to the R&D department

### Role profile:

- Bachelor or Master working level
- Feel for quality
- Good command of English, both spoken and written
- Structured approach to work
- Analytical
- Result driven
- Team player
- Pro-active/self starter
- Development-focused
