Instructions for use

Product description

For the end-user information consists of the instructions for use and surgical technique. The operating procedure is described step by step in the surgical technique. Further copies of the instructions for use and surgical technique can be requested at BAAT Medical Products B.V.

Intended purpose

The Fortlink®-C is indicated for cervical interbody fusion procedures in selected patient with degenerative disc disease (C2-T3) in patients with degenerative disc diseases. The Fortlink®-C T1 interbody fusion devices are manufactured with SLIM technology. The implants are made from grade 1 titanium and feature a thin-walled design to reduce the overall height and weight of the device. The bone-shaped design is intended to provide primary stability and increase the intervertebral height and lordosis.

The Fortlink®-C T1 implant will be used in combination with:

• General instrument set (see surgical technique for Catalogue instruments)

• General instruments

• Surgical instruments

• Instrumentarium
